toxic chemicals in the pdf - Bees
can suffer serious effects from
toxic chemicals in their
environments. These include
various synthetic chemicals, such
as insecticides and fertilizers, as
well as a variety of naturally
occurring chemicals from plants,
such as ethanol resulting from the
fermentation of organic materials.

GUIDELINES ON THE
PREVENTION OF TOXIC
EXPOSURES - Types. There are
generally four types of toxic
entities; chemical, biological,
physical and radiation: Chemical
toxicants include inorganic
substances such as, lead, mercury,
hydrofluoric acid, and chlorine
gas, and organic compounds such
as methyl alcohol, most
medications, and poisons from
living things.
